Ref No: C19Y2026M101623778

Internship Offer Letter

Student Name	: Anant Raj
Stream	: B.Tech
Branch	: B.Tech(Computer Science and Engineering)
Institute Name	: IILM University, Greater Noida
Internship Domain	: Celonis AI In Process Intelligence
Internship Duration	: October 2026 - December 2026
AICTE Student ID	: STU69986302ad9bd1771594498

We are pleased to inform you that you have been selected for the 8-Week **AICTE – EduSkills Virtual Internship Program**.

During this internship, you will learn and demonstrate industry-relevant skills that will enhance your employability and strengthen your confidence in the subject area.

The program is designed to provide structured learning combined with practical exposure.

Internship Structure & Evaluation:

- The internship will follow a **week-wise structured learning plan**.
- You will be required to complete **weekly assessments** to track your progress and understanding.
- Certain modules will require submission of **project documentation and assignments**.
- In the final week, you must appear for a **Final Assessment Test**.
- The final grade will be based on your overall performance, including weekly assessments, project submissions, and the final test.

Upon successful completion of all required steps and assessments, you will be awarded a **Virtual Internship Certificate**.

Please note that this offer letter will be considered valid only after the successful completion of the internship program and fulfillment of all assessment requirements, including obtaining the final completion certificate. Without the final completion certificate, this offer letter shall not be treated as a valid document for any official purpose.

The week wise Structure of the Internship is as Follows:

Week	Module	Description
Week 1	Google Cloud Computing Foundations: Cloud Computing	Introduces cloud computing fundamentals, Google Cloud services, compute options, and hands-on labs to build practical skills in IaaS, PaaS, serverless, and containerized applications.
Week 2	Google Cloud Computing Foundations: Infrastructure in Google Cloud	Google Cloud infrastructure, including storage, managed SQL/NoSQL services, APIs, Pub/Sub, IAM, encryption, and hands-on labs to build practical cloud infrastructure skills.
Week 3	Google Cloud Computing Foundations: Networking & Security in Google Cloud	Google Cloud networking and security, including VPCs, IPs, routes, firewalls, load balancing, hybrid clouds, IaC with Terraform, observability, and hands-on labs.
Week 4	Google Cloud Computing Foundations: Data, ML, and AI in Google Cloud	Google Cloud big data services, ETL pipelines, Dataflow, Dataproc, BigQuery, Dataprep, machine learning with Vertex AI, AutoML, and AI APIs with hands-on labs.
Week 5	Implementing Cloud Load Balancing for Compute Engine	Creating and deploying Compute Engine VMs, configuring network, application, and internal load balancers, with hands-on labs and a challenge assessment for skill validation.
Week 6	Set Up an App Dev Environment on Google Cloud	Building and connecting cloud infrastructure with Cloud Storage, IAM, Cloud Functions, and Pub/Sub through hands-on labs and a challenge for skill badge validation.
Week 7	Build a Secure Google Cloud Network	Building, scaling, and securing Google Cloud networks using VPCs, firewall rules, IAM, load balancers, and internal access, validated through hands-on labs and a challenge.
Week 8	Prepare Data for ML APIs on Google Cloud	Preparing data for Google Cloud ML APIs using Dataprep, Dataflow, Dataproc, and calling Cloud Natural Language, Speech-to-Text, and Video Intelligence APIs.
Final Credential Validation / Internship Grade Point Assessment		

Note: There is no stipend associated with this internship.

We congratulate you on your selection and wish you a successful learning journey.
