Internship Offer Letter

Student Name : Anant Raj
Stream : B.Tech
Branch : B.Tech(Computer Science and Engineering)
Institute Name : IILM University, Greater Noida
Internship Domain : Advanced Robotics Using AI And IoT
Internship Duration : April 2026 - June 2026
AICTE Student ID : STU69986302ad9bd1771594498

We are pleased to inform you that you have been selected for the 8-Week **AICTE – EduSkills Virtual Internship Program**.

During this internship, you will learn and demonstrate industry-relevant skills that will enhance your employability and strengthen your confidence in the subject area.

The program is designed to provide structured learning combined with practical exposure.

Internship Structure & Evaluation:

- The internship will follow a **week-wise structured learning plan**.
- You will be required to complete **weekly assessments** to track your progress and understanding.
- Certain modules will require submission of **project documentation and assignments**.
- In the final week, you must appear for a **Final Assessment Test**.
- The final grade will be based on your overall performance, including weekly assessments, project submissions, and the final test.

Upon successful completion of all required steps and assessments, you will be awarded a **Virtual Internship Certificate**.

Please note that this offer letter will be considered valid only after the successful completion of the internship program and fulfillment of all assessment requirements, including obtaining the final completion certificate. Without the final completion certificate, this offer letter shall not be treated as a valid document for any official purpose.

The week wise Structure of the Internship is as Follows:

Week	Module	Description
Week 1	Introduction to Robotics Concepts & Terminology Basic Electronics for Robotics	Fundamentals of robotics and essential electronic principles including voltage, current, resistance, and circuit basics.
Week 2	Introduction to Microcontrollers Sensors in Robotics	Microcontroller architecture, programming basics, and sensor principles for environmental data acquisition.
Week 3	Actuators in Robotics Programming for Robotics (Python/C++)	Motors and servo control along with programming fundamentals for robot control systems.
Week 4	Robot Kinematics & Motion Control Introduction to AI for Robotics	Motion control principles and foundational AI/ML concepts for intelligent robotic behavior.
Week 5	Machine Learning for Perception IoT for Robotics	Applying machine learning for perception and integrating IoT for connected robotics systems.
Week 6	Data Acquisition & Processing Robot Simulation & Virtual Environments	Processing sensor data, decision-making algorithms, and simulation tools for robotics testing and validation.
Week 7	Ethical Considerations & Safety in Robotics	Robotics ethics, safety protocols, responsible innovation, and safe deployment standards for robotic systems.
Week 8	Project-Based Integrated Robotics Troubleshooting & Debugging Robotics Systems	Designing and implementing a small-scale integrated robotics project along with practical strategies for diagnosing, resolving, optimizing, and maintaining robotics system performance.
Internship Grade Point Assessment		

Note: There is no stipend associated with this internship.

We congratulate you on your selection and wish you a successful learning journey.
